

Please do not allow this group to convince you to allow wisconsin to follow the federal rules. As someone who signed up on both federal and state no call list, I did it because I do not want to receive these calls. In our household there is someone who works shifts and before the call list we would receive calls from 8.00am until 9.00 pm 7 days a week. Also I work for a company that I am on the phone off and on all day and I hate being on the phone when I'm not at work. I want the chose of who I give my number to and who calls me. When these telemarketers call they get about three words out before I hang up. It's a waste of my time and thiers. Please do not allow this to happen.
